2018-2022

Midlands State University

Bachelor of Commerce in Information Systems

ALLAN SIMOYI

SOFTWARE ENGINEER

PROFILE

Full-stack software engineer with over 4+ years of experience writing useful software. Strong track record of delivering scalable solutions that meet user needs and business objectives. Always eager to learn and grow.

WORK EXPERIENCE

Road Rules Solutions

Full Stack Software Engineer

Dec 2022 - Present

- React: Implementing driving license test preparation apps, analytics tools and content management systems.
- NodeJS: Writing system of record software to store banks of test questions and answers to the tests.

TBGA Consulting Group

Full Stack Software Engineer

Apr 2021 - Dec 2022

- Stack Migration To NextJS: Reduced up to 40% in user support tickets by migrating to NextJS.
- DevOps and Workflows: Implemented a continuous delivery pipeline, resulting in at least a 50% decrease in deployment failures and faster deployment process.
- Refactoring: Reduced page load times by 60% and average API response times by 50% by refactoring and optimizing legacy codebases

Road Rules Solutions (Part Time)

Full Stack Software Engineer

Nov 2020 - Apr 2021

- UX Design & Front-end CRA work: Collaborated on designing app user interfaces and making them responsive on several mobile devices.
- Legacy codebase debugging & refactoring: Reduced system downtime and increased infrastructure stability through effective diagnosis and resolution of technical issues in the organization's infrastructure.

Celestial Bureau de Change (Internship)

Full Stack Software Engineer

Nov 2019 - Nov 2020

 Infrastructure Design & Vanilla JS: Created and maintained internal CRM infrastructure critical for daily currency exchange and remittance operations, ensuring at least 90% uptime and continuous, seamless facilitation of transaction processing.
